The image displays three hand-drawn graphs on grid paper, each representing data for a different class. The graphs are arranged vertically. Each graph has a vertical axis labeled 'Class' and a horizontal axis labeled 'Count'.

- Graph 1 (Top):** The vertical axis is labeled 'Class' and has tick marks from 1 to 25. The horizontal axis is labeled 'Count' and has tick marks from 0 to 10. Data points are plotted as 'X' marks. The distribution is roughly bell-shaped, peaking around Class 10-12 with a count of approximately 8.
- Graph 2 (Middle):** The vertical axis is labeled 'Class' and has tick marks from 1 to 25. The horizontal axis is labeled 'Count' and has tick marks from 0 to 10. Data points are plotted as 'X' marks. The distribution is roughly bell-shaped, peaking around Class 10-12 with a count of approximately 8.
- Graph 3 (Bottom):** The vertical axis is labeled 'Class' and has tick marks from 1 to 25. The horizontal axis is labeled 'Count' and has tick marks from 0 to 10. Data points are plotted as 'X' marks. The distribution is roughly bell-shaped, peaking around Class 10-12 with a count of approximately 8.

Each graph also includes a small table at the top right corner, likely a legend or summary table, with columns for 'Class' and 'Count'.
